I'm a seasoned customer service expert on a journey to become a coding aficionado! I'm an artist at heart and being able to incorporate that into the tech world has been most exciting for me. Though I'm new to coding, the Full Stack Development Bootcamp at the University of Texas at Austin has shown me endless possibilities, and I hope to explore them with your company.

EDUCATION

The Coding Boot Camp at UT
Austin Web Development Boot Camp

Rigorous 24-week full stack development course.

Austin, TX
Feb 2024- Aug
2024

Udemy

The Complete JavaScript Course 2024: From Zero to Expert!

Ongoing

SKILLS

Frontend: HTML5, CSS, jQuery, JavaScript, React, Bootstrap, The DOM, APIs, JSON, AJAX

Backend: SQL, MongoDB, Express, ReactJS, Node, NoSQL, Testing

FRONT-END PROJECTS

Weather Search / [Repo](#) / [Deployed](#)

A user-friendly weather dashboard designed for seamless exploration of current and upcoming weather forecasts for cities worldwide.

- Developed a weather dashboard that utilizes a 5-Day Weather Forecast API. Implemented a feature that saves the last searched cities as buttons for easy access and quick reference
- HTML, CSS, JavaScript, Server-Side APIs

My Blog / [Repo](#) / [Deployed](#)

A platform enabling users to effortlessly craft blog posts, providing them the flexibility to either preserve or discard their creations at their discretion.

- Developed a content form with dynamic blog post rendering and integrated a light/dark mode toggle for enhanced user experience
- HTML, CSS, Web APIs, JavaScript

Employee Payroll Tracker / [Repo](#) / [Deployed](#)

A website designed for payroll managers to efficiently track employee payroll data by entering their names and salaries.

- Developed an application enabling payroll managers to efficiently view and manage employee payroll data, featuring a function to display a random employee in the console and calculate the average salary of employees.
- HTML, CSS, JavaScript

BACK-END PROJECTS

SVG Logo Maker / [Repo](#)

This command-line app allows freelance web developers to generate a simple logo by entering text, text color, shape, and shape color, resulting in a custom SVG file named logo.svg.

- Developed a command-line application that generates an SVG file based on user responses to a series of questions.
- Objected-Oriented Programming, Node.js

E-Commerce Back End / [Repo](#)

A back-end system for an e-commerce website.

- Developed a back-end platform for an e-commerce website using Express.js, PostgreSQL, and Sequelize, allowing a manager to connect to the database, create and seed it, start the server, and perform CRUD operations via API routes

Employee Tracker System [Repo](#)

A command-line application for business owners to view and manage departments, roles, and employees, enabling better organization and planning.

- Developed a backend application for business managers to add employees to their database, assign to a manager, update their department and role, add a role, add a salary and view all the above in a table.
- SQL

PREVIOUS EMPLOYERS

Business Associate

Heartland Dental

August 2023-Current

Welcome patients warmly while handling front office tasks such as phone calls, emails, and mail. Use Dentrix for scheduling, patient records, insurance claims, and payments. Discuss treatment fees and payment options with patients and work with the team to ensure smooth office operations.

Healthy Living Lead

H-E-B

January 2021- August 2023

Supervise and train department employees to meet performance standards, plan engaging displays to enhance the customer experience, and foster strong customer relationships by understanding their health goals. Collaborate with other departments, analyze sales data to forecast future projects, and develop innovative ideas to improve team and department performance.
